### EDITOR'S VOICE

Dear Parents and Students,

We have celebrated our 27th Annual Day celebrations in the month of March with the great spirit and enthusiasm. We have witnessed the cultural fest by our students and proved our allround development. Our Senior students wrote their SSC public exams in a very serious mode with heartfull preparation. Hope they have completed their exams with perfect satisfaction.

April is the month of examinations that are to be conducted at the end of the year on the entire syllabus. All the parents and students are once again reminded to concentrate on these Annual Examinations. May be all the students are eagerly waiting for Summer Holidays. But don't forget that "time" is more valuable than money always. So plan your summer vacation properly, some time for reading books, some time to spend with grand parents and the balance time to play outdoor games such as Cricket, Shuttle, Throwball etc.

- Dr. M.V.R.Krishnaji

ALL THE BEST TO OUR X CLASS STUDENTS

# TEACHERS' TALK

## **The Beauty of Numbers: A Teacher's Perspective**

**O. Mahesh** Mathematics Teacher, Gurajada School

I am O. Mahesh, a Mathematics teacher at Gurajada School, with 15 years of experience in guiding students through the fascinating world of numbers. Teaching mathematics is more than just solving equations—it's about building logical thinking, problem-solving skills, and a love for learning.

For many students, math can seem challenging, but I believe that with the right approach, it can become enjoyable and engaging. My goal has always been to simplify complex concepts, make learning interactive, and help students see the practical applications of mathematics in everyday life.

Over the years, I have witnessed students transform from hesitant learners to confident problem-solvers. Their "Aha!" moments, when they finally grasp a difficult concept, are the most rewarding experiences for me as a teacher.

Mathematics is not just about numbers; it's about reasoning, creativity, and perseverance. As I continue my journey in teaching, I remain committed to making math an exciting subject for every student who walks into my classroom.

## **Igniting Curiosity Through Science**

**T. Laxmi**

**Science Faculty (Grades 6-10), Gurajada School**

As a Science faculty for grades 6 to 10 at Gurajada School, I, T. Laxmi, have always believed that science is not just a subject—it is a way of thinking, questioning, and understanding the world around us.

For years, I have encouraged my students to go beyond textbooks, to observe, experiment, and explore scientific principles in real life. Science is best learned through curiosity, and I strive to make my classes interactive and engaging, where students are active participants rather than passive learners. From the tiniest atoms to the vastness of the universe, every topic we explore in class connects to the wonders of nature and technology. My greatest joy as a teacher is seeing students develop a scientific mindset—one that pushes them to ask "why" and "how" instead of simply accepting answers.

Teaching science is more than delivering lessons; it's about nurturing young minds to become critical thinkers and innovators of the future. As I continue this journey, my mission remains the same to make science exciting, relevant, and accessible to every student.

## **Teaching for a Better Tomorrow**

I am U.V. Rajyalakshmi, a Social Studies faculty at Gurajada School, with over two decades of experience in shaping young minds. Social Studies is more than just a subject—it is a gateway to understanding our past, present, and future. It teaches students the importance of history, geography, civics, and the role they play as responsible citizens.

Over the years, I have had the privilege of helping students develop a deeper appreciation for the world around them. My goal has always been to make learning engaging, bringing history to life through storytelling, discussions, and real-world connections. Education is not just about memorizing facts; it's about critical thinking, problem-solving, and applying knowledge to everyday life. Watching my students grow into informed, aware, and thoughtful individuals is the most rewarding part of my journey.

As I continue my teaching career, I remain committed to inspiring young learners and guiding them toward a future where they can contribute meaningfully to society.

## **Celebrating Hindi Heritage: A Journey Through Language**

**P. Gowri Devi**

**High School Hindi Teacher, Gurajada School**

For the past 20 years, I have had the privilege of teaching Hindi at Gurajada School—a journey that goes far beyond textbooks and exams. Every day in the classroom is an opportunity to immerse my students in the vibrant colors of our language, its literature, and the rich traditions that define it.

In my classroom, Hindi isn't just a subject; it's a living, breathing art form. I blend classic poetry with contemporary narratives, inviting students to explore how language shapes our identity and connects us to our cultural roots. I cherish the lively discussions, the creative storytelling, and the moments when a student's eyes light up as they discover a new verse or a forgotten word.

My goal is to create a space where tradition meets innovation—a place where learning Hindi becomes an engaging, dynamic experience. Each lesson is crafted to not only teach grammar and vocabulary but also to inspire a deep appreciation for the beauty and power of language.

Reflecting on two decades of teaching, I feel immense gratitude for the countless moments of discovery and growth shared with my students. As I continue on this journey, I remain committed to igniting a lifelong passion for Hindi in every learner who walks through my door.

(26) VIII (Girls) - Raghupati Raghava

(27) VIII (Girls) Tribute to Freedom Fighters

(28) IX (Boys) - Koi Kethata hae... (Remix Songs)

### ANNUAL DAY CELEBRATIONS

We have celebrated our 27th Annual Day activities in a big way in our own School Campus. We feel very proud to say that our Hon'ble Director Dr. M.V.R.Krishnaji is joining us from this academic year, as a full time Director. We are going to observe a big change from the Gurajada Students community in the coming years with full time support of our Director. These celebrations got a very soundlook by the attedance of the then MLC Sri Pusapati Raghu Varma garu and our Vizianagaram District Educational Officer Sri V. Manikyam Naidu garu.

We have conducted 27 cultural activities exposing different areas like from LKG to 10th Class Students. All the cultural items gave a wonderful social message for the community. No where we got the smell of the present cinematic culture. We have taken all precautionary measures to involve maximum number of students in this activities. Some of the items are related to Mahakavi Gurajada Life Story, Patriotism, Kavali Dance, Funny Songs, Freedom movement, Traditional dances, Village Life style... etc. Also we have felicitated the Top Three Students in every section of the classes right from LKG to 10th Class.

On this occassion our Guests gave a wonderful message to all the audience, stating that the parent, the teacher and the Student should act with co-ordination. Then only we can expect wonderful results. The high school stage education will impart the strong foundation for the bright future. The guests also felt that those students who are very strong in schooling are going to enjoy beautiful life as well as they can give the same enjoyment concern parents also. The parents often visit the school atleast once in 10 days to enquire about the academic as well as the behaviour performance of their ward. These visits by the parents will reflect as the accountability for the students and also it is nothing but the interaction between the students-the parent and the teacher. Such meetings are going to get a miraculous chages among the students.

Nowadays the stuents eventhough they don't listen parents instructions, but they follow the actions of their parents only. With this the parents should take all precautionary measures to mould their behaviour it self, reflects automatically the behaviour of the students.

## FEATURE OF APRIL MONTH

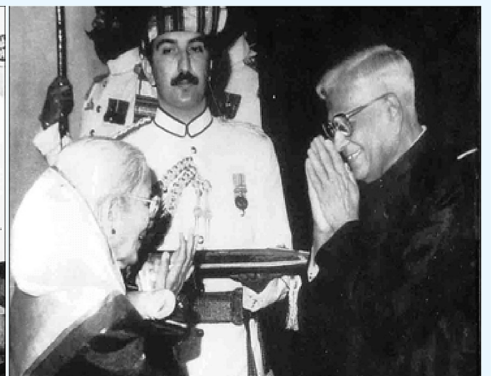

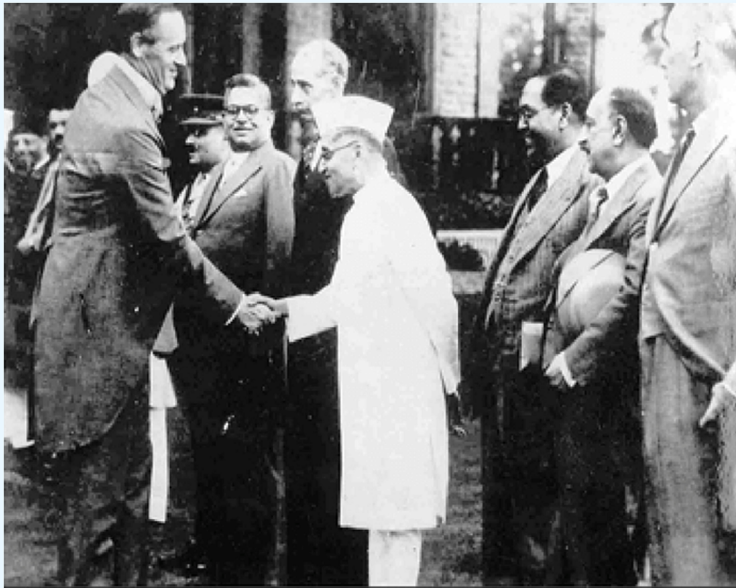

### Dr. B. R. AMBEDKAR JAYANTHI (14th APRIL)

Indian history is known for numerous legendary heroes. Sri Bhimrao Ramji Ambedkar was one of them. He was born on 14 April 1891, at Mhaw near Indore in Madhya Pradesh. He started his formal education at village school, due to his caste, he was not allowed to sit in the class. He took admission in the University of Bombay. Later he went to England for higher studies in 1932. Spent his entire life in fighting against social evils like untouchability, caste system and social discrimination towards the lower classes.

After independence, Ambedkar became the first law minister in the Union cabinet. He was also appointed as the chairman of constitution drafter committee and he was known as the “Father of the Constitution”. He was honoured with “Bharat Ratna” the highest civilian award of India. His birth day is celebrated as “Ambedkar Jayanti” every year and millions of people pay gratitude to him for his noble work.
